

Melon Documentation Generator

created by Melon

Course: OOP

Project repository:

Melon-TeamProject

<https://github.com/dentia/Melon-TeamProject>

Description:

A simple documentation generator targetet at Telerik Academy's students. It is designed to help with the documentation creation for teamworks. The application collects information about:

- Current teamwork:
course, team name, project type and project name
- Project description
- Project repository
- Used recourses
- Screenshots with desription
- Team members:

first, last and username, and wheather they participated in the project

After all the information is collected, a PDF file is created, using the iTextSharp library.

Used resources:

Stack Overflow
<http://stackoverflow.com/>

MSDN
<https://msdn.microsoft.com/>

Mike's DotNetting
<http://www.mikesdotnetting.com/>

Project participants:

Goran Cvetkov (Goran91) - participated [V]

Mihaela Encheva (dentia) - participated [V]

Kalin Dimchev (kalin.dimchev) - participated [V]

Martin Matev (Martin.Matev) - participated [V]

Pavel Iliev (ilievpavel) - participated [V]

Atanas Dachenski (adachenski) - participated [V]

Ivo Gergov (igergow) - NOT participated [X]

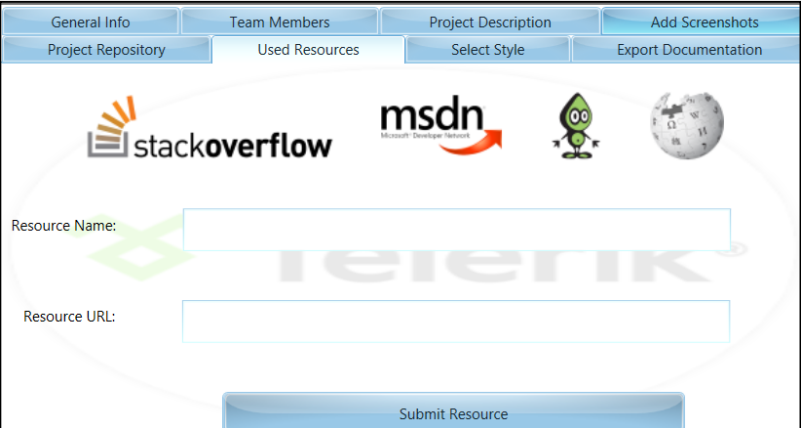

Yane Yosifov (Curiosity) - NOT participated [X]

Emil Mitev (E.Mitev) - NOT participated [X]

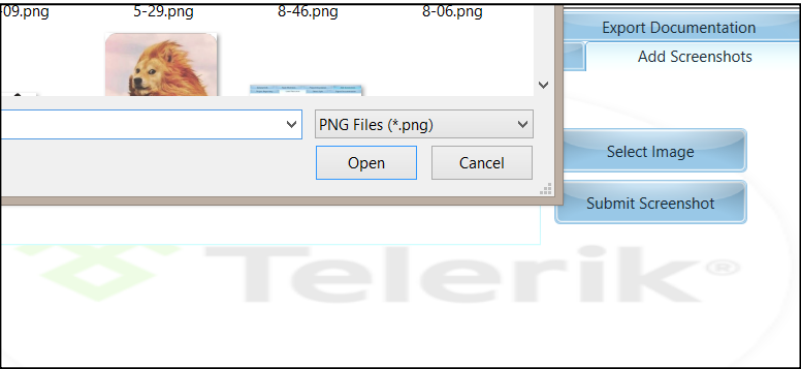

Screenshots:

The external recourses tab. The user can add the recourses which helped him with the project creation. The most popular recourses can be added by clicking on their logos.

The user can easily add screenshots and description to them.

The application has multiple themes so the user can personilize his application.

The ExpressionDark theme.

Theme: TwilightBlue

- TwilightBlue
- ExpressionDark
- ExpressionLight
- ShinyDarkPurple
- DavesGlossyControls
- BubbleCreme
- PeachDelight
- UXMusingsBubblyBlue
